

Factory Cat
To Whom It May Concern:

Thank you for the delivery of our new floor scrubber.

It works and performs as well as promised. In fact we had reservations about the cost until we asked our used machinery vendor about used floor scrubbers and he said... "get the Factory Cat, it is the Cadillac of the scrubbers. You will want one eventually".

The machine had the ability to clean off 50 years of manufacturing oil from our concrete floors and help limit the spread of grime into our office areas.

Then, after the demo period we were sure it was a quality machine with good engineering.

And the fact that it is made in America and the ability to get parts easily made the decision easy.

Thanks again for your help,
